

Project microverse: Schedule

Monday to Friday, 14:30 – 17:30

	Monday	Tuesday	Wednesday	Thursday	Friday	
Week 1	18 May – Intro by Dr. Sudipta Tung (evaluation criteria etc) – Baseline Test – Intro to module, UG Lab – Fingerprints – LB	19 May – Invisible microbes – How to make them visible & study them? – Pipetting practice – Aseptic handling	20 May – Intro to bacterial culture – Microbiome in detail, good vs bad etc – Looking at colonies of fingerprints	21 May – Making plates (Demo) – Plating samples – Projects / Groups discussion	22 May – Initiation of projects – Doubts – Buffer time	
Week 2	25 May – Intro to how molecularly study colonies – DNA / PCR Introduction – Discussion	26 May – Setting up PCR (Demo.)	27 May – DNA visualization by agarose gel (Demo.)	28 May – Setting up project PCR & gel – Project discussion	29 May – Doubts – Buffer time – Feedback from students	
Week 3	1 Jun – Understanding PCR and gel results – Intro to concept of 16S rRNA	2 Jun – Intro to Sanger seq. – What these results tells us biologically?	3 Jun – Project follow-up	4 Jun – Buffer day for project work	5 Jun – Plating / PCR / Gel – Doubts – Buffer time	
Week 4	8 Jun – Intro to Bio-informatics – BLAST Demo – Results discussion	9 Jun – What we learned – Scientific Method – Project follow-up – PPT prep.	10 Jun – Project PPT prep. – PPT finalization Mock 1	11 Jun – Project PPT Mock 2 – Results discussion – Pending work	12 Jun – End of course test – Feedback – Goodbyes!
